

LINCO B72

Threading Cap. **20 to 63MM**
 Threading Length. **500MM**

Ultimate Solution for External Thread Cutting. The Lanco B72 model, a Bigger, Heavier, More capacity variant, is ideal for enduring heavy workloads such as TMT Bar, and Scaffolding Threading and is beginner-friendly with added durability. With or without a LeadScrew, and three size options (40mm, 63mm, 75mm dia), the thread length is customizable to meet your specific needs

K S BANSAL MACHINE TOOLS

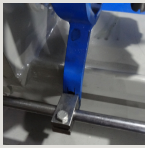

Why Choose Us

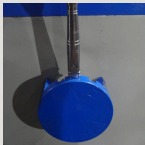

Enhanced Gib Design

Our innovative gib design isn't just about aesthetics; it's about maximizing the lifespan of your equipment. More contact points between the saddle and bed mean extended durability and reliability, setting us apart from the competition.

Easy Maintenance Access

Efficiency meets convenience with our equipment's design. We prioritize easy maintenance access, streamlining processes, minimizing downtime, and maximizing operational efficiency for a seamless experience.

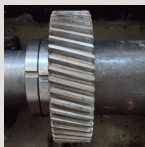

Durable Gear Changing Mechanism

Experience a gear-changing mechanism that not only lasts longer but also enhances overall machine durability, reducing maintenance frequency and costs while ensuring smooth operations.

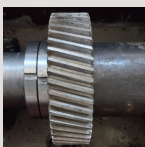

Chucknut on Vice Screw

Discover ingenuity in every detail; our vice screw features a chucknut, compensating for wear over time, ensuring precision and reliability throughout the equipment's lifecycle.

Increased Gear Width

Engage with the epitome of durability through our machines adorned with gears of expanded width, heralding an era of sustained gear life and perpetual excellence.

Helical Gears

Behold the serenity of efficiency – our helical gears, where noise reduction is not just a feature but a harmonious integration, cultivating a tranquil ambiance for optimal productivity.

Applications

- TMT/ Rebar Threading
- Hex Bolt Threading
- U-Bolt Threading
- Pipe Threading
- Scaffolding Threading
- Fork Threading

Services

- Machine Installation and Setup
- Operational Training
- Preventive Maintenance
- On-Site Repairs
- Spare Parts Supply
- Technical Support
- Calibration and Testing
- Consultation Services

Customization

- Work Holding Vice Type
- Custom Jaws Design
- Type of Leadscrew Nuts
- DieHead Cover Customization
- Length Controller Option
- Automation Options
